Logan Health Medical Center Laboratory STAT Test List

It is the policy of the Logan Health Medical Center Laboratory to provide accurate and timely test results for all patients requiring laboratory testing and studies, as defined by their physicians. To facilitate this process, guidelines are defined for ordering specific tests as **STAT**, to assist providers in treating patients experiencing medical emergencies or life-threatening situations. This policy and included laboratory tests are reviewed and approved annually by the Laboratory Medical Director and the Medical Executive committee.

- **STAT** is a medical term used to imply urgent or rush.
- **STAT** tests should be ordered when patients are experiencing a Medical Emergency or Life-Threatening situation. **STAT** orders take priority over all routine testing and are resulted as expediently as possible.
- The *inappropriate usage* of STAT test ordering, inflates STAT testing volumes and causes unnecessary STAT orders to delay overall STAT test results. Thus, negatively impacting the care of critically ill patients.
- For tests ordered as STAT, the target turnaround time (TAT) is **one hour** from <u>time of receipt</u> in the laboratory processing department.
- Some tests have analytic times longer that one hour. Review the STAT test list below.
- <u>Tests ordered from outpatient facilities may experience delays in the specimen transport time that will affect</u> the time of receipt into the laboratory and overall STAT resulting time.

The following is the list of tests that have been approved and reviewed for STAT test priority. Tests that are not listed will be performed STAT only if the requesting physician has received approval by a Pathologist.

HEMATOLOGY

CBC CBC w/Diff Cell Count ESR or Erythrocyte Sedimentation Rate Fetal Fibronectin P2Y12 Platelet Function Platelet Function Assay ROM Plus Urinalysis

COAGULATION

D Dimer Fibrinogen Prothrombin Time (PT) Partial Thromboplastin Time (PTT) Anti - Xa

BLOOD BANK

Crossmatch Direct Antiglobulin Test (DAT) Type and Screen

SEROLOGY

CSF Mono Pregnancy Test – Urine or Serum

MICROBIOLOGY

Antigen Testing on CSF and/or Urine Gram Stain Occult Blood GAS PCR Gastric Occult GBS PCR India Ink Prep Influenza A/B PCR

MICROBIOLOGY

LPCB for Fungal Elements Malaria MRSA PCR MRSA/SA SSTI PCR PCT Rapid Strep RSV TB PCR Vaginosis Panel

MOLECULAR DIAGNOSTICS

Clostridium difficile Group B Strep MRSA (**1.5 hour TAT**)

CHEMISTRY

ABG Acetaminophen Alcohol Ammonia Amylase Estradiol (IVF Patients only) (90 MIN TAT) **Basic Metabolic Panel** Gentamicin HCV (Exposures only, 2 hour TAT) HBsAG (Exposures only, 2 hour TAT) HIV 1.2 (Exposures only, 90 MIN TAT) Lactic Acid Basic Metabolic Panel (BMP) Electrolytes Glucose, BUN, Creatinine, Calcium **B-HCG** Carbamazepine Carboxyhemoglobin

CHEMISTRY

Cardiac Markers CK, CK-MB, Myogl, Trop I Comprehensive Metabolic Panel (CMP) BMP, T.Bili, T.Prot/Alb, AST/ALT, AlkP Liver Panel T Prot/Alb, T&D Bili, AST, ALT, AlkP, GGT **CRP** Quant CSF (Glucose and Protein) Digoxin Dilantin **Drug Screen Urine** Electrolytes, Serum (NA, K, CL, CO2) Electrolytes, Urine (NA, K+) Free T4 LDH Lipase Lithium Magnesium Methemoglobin NT - pro BNP Osmolality Phenobarbital Phosphorus Prolactin Salicylate Т4 Theophylline TSH Uric Acid Valproic Acid Vancomycin
